Emerging findings: local authority analysis

Source: [Alasdair Rae \(2016\)](#)

Emerging findings: local authority analysis

- Comprehensive analysis by the [Resolution Foundation](#):
 - No relationship between recent changes in an area's prosperity and how they voted
 - 'Long-term entrenchment' led to support for Brexit
 - Accounting for education and employment status, no relationship with pay or age

Motivations for JRF's work

- Need to look beyond area-level characteristics
- What was the role of poverty, place and individual characteristics in the leave vote?

JRF's work

Brexit vote explained: poverty, low skills and lack of opportunities

Matthew Goodwin and Oliver Heath

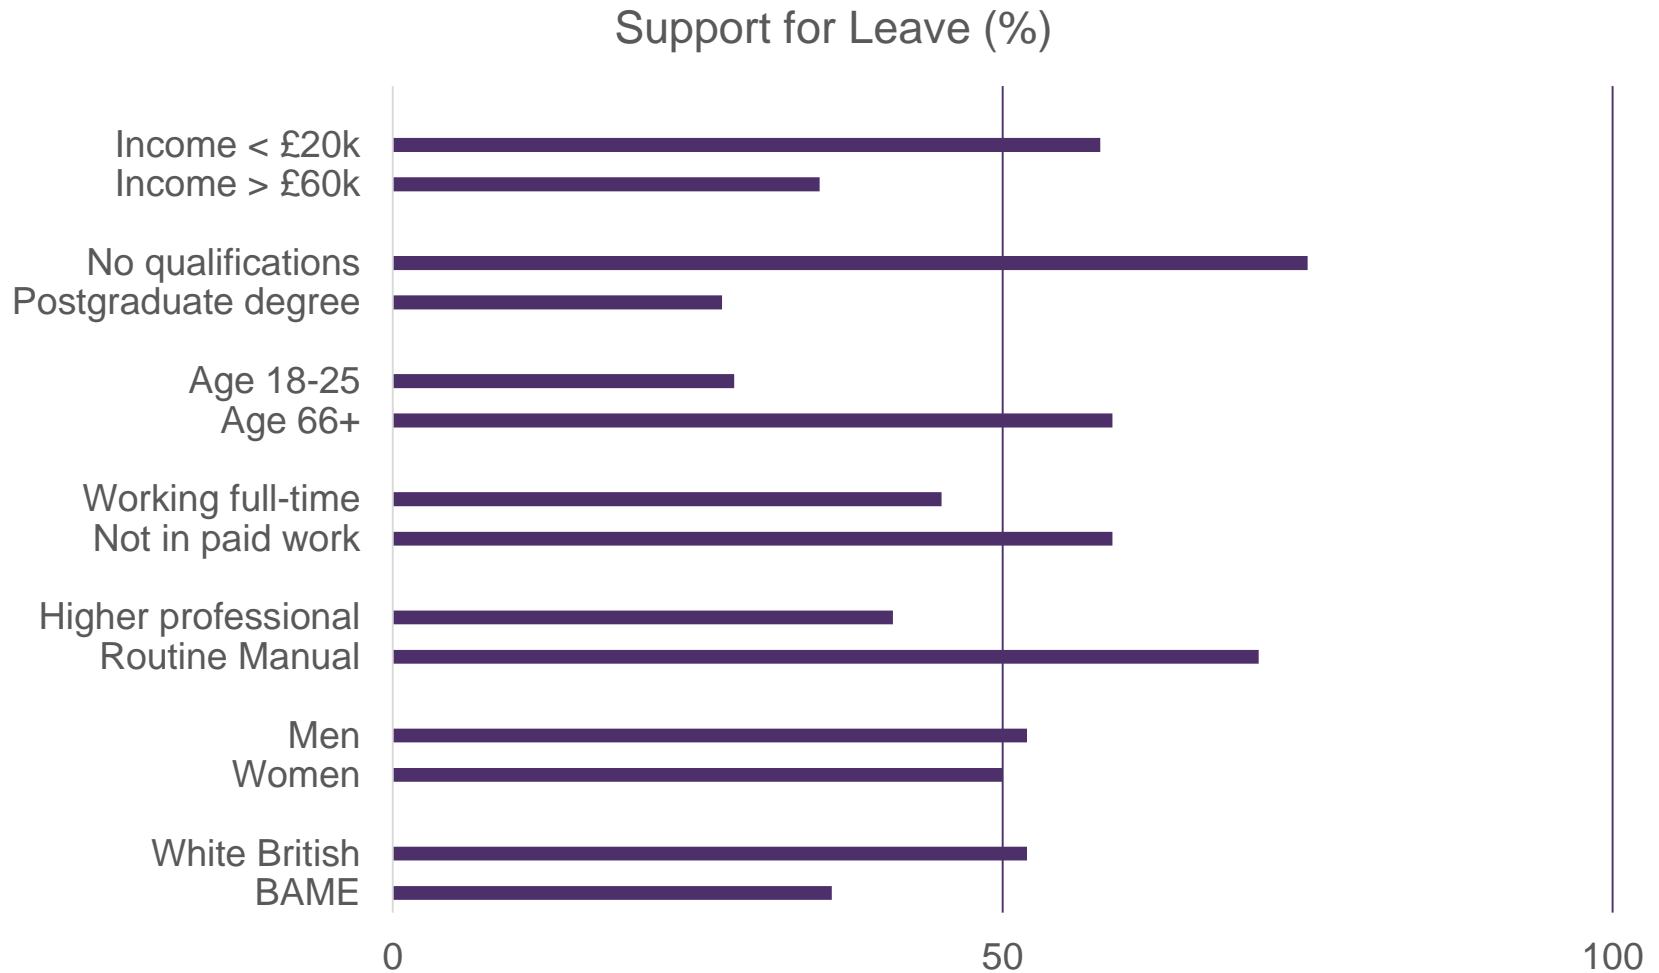

31st Aug 2016 | Related topics: [Economic development and local growth](#) [Equality](#) [Living standards](#)

This report provides unprecedented insight into the dynamics of the 2016 vote to leave the EU, showing how a lack of opportunity across the country led to Brexit.

British Election Study

- Internet survey, 31,000 respondents
- From just before the referendum, May and June 2016, and
- Includes attitudes, social and political values, demographic variables
- More detailed focus on place: parliamentary constituency rather than local authority

Divided support for leave

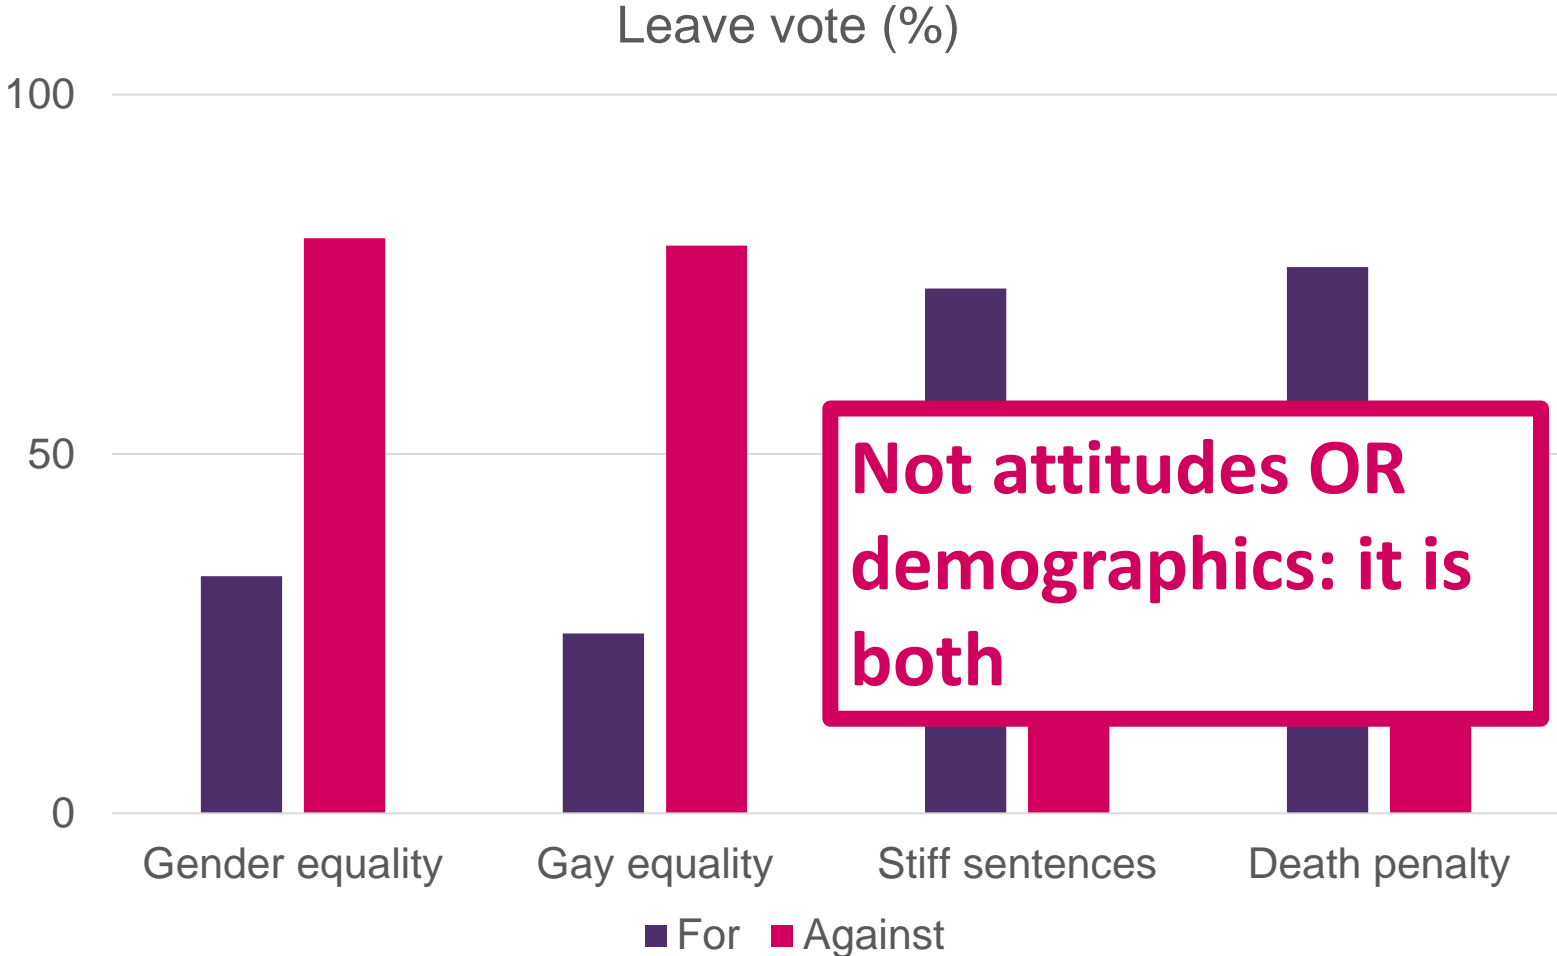

Source: [Goodwin and Heath \(2016\)](#)

Which factors matter most?

Individual Characteristics	Coefficient (log odds ratio)
Household Income	
£20-39,000	-0.12**
£40-59,000	Income mattered
£60,000 plus	-0.39***
Education	
A Level	Education mattered most
University Education	
Age	0.02***
Female	-0.03
Ethnic Minority	-0.26**
White Other	-0.56***
Constant	-0.26
N	19,903

Attitudes and values

Source: [Goodwin and Heath \(2016\)](#)

The importance of place

Predicted vote leave (%) by education and area type

**‘Double whammy’
of being low-skilled
in a low-skilled area**

Source: [Goodwin and Heath \(2016\)](#)

Immigration

- Overall, higher migrant share associated with lower leave vote
- Other characteristics equal, recent influx of migrants associated with higher leave vote ([Goodwin and Heath 2016](#))

Conclusion

Conclusion

- Three key findings:
 - Poverty mattered
 - Educational divides mattered more
 - Place mattered: there is a 'Double whammy' of being low skilled in a low skilled area

The EU referendum highlights social and economic divides that need to be healed
